TITLE

TO

Cessna Distributors, Service Stations and CPC's

MODELS AFFECTED

All propeller model airplanes

DISCUSSION

This Service Newsletter provides notification that Federal Aviation Administration (FAA) Flight Standards Information Bulletin for Air Transportation (FSAT) Bulletin Number FSAT 05-02: FAA - Approved Deicing Program Updated, Winter 2005 - 2006 has been issued. FSAT 05-02 provides revised SAE qualified Types I, II, III and IV fluid holdover time guidelines and the associated guidelines for the application of these deicing/anti-icing fluid mixtures to the airplane.

FAA Bulletin Number FSAT 05-02 may be accessed on the Internet at the following web site address: http://www.faa.gov/library/manuals/examiners_inspectors/8400/fsat/media/2005/fsat0502.doc.

NOTE: It is extremely important to remember that any frozen moisture (frost, snow, ice, etc.) must be removed from the airplane before flight.

And, only airplanes properly certified and equipped are approved for flight into known icing conditions as defined in the Federal Aviation Regulations.
