TITLE
STATIC WICK REPLACEMENT

TO
Cessna Distributors, Service Stations and Cessna Pilot Centers

MODELS AFFECTED
All Cessna model 172R and 172S airplanes.

DISCUSSION
A new two piece static wick is now available which allows replacement of the wick simply by unscrewing the old wick and screwing a new one into the separate threaded base riveted to the airplane. The new wicks are stiffer to reduce vortex spinning which enhances the service life of the static wick. The two piece static wicks may be installed as described in MK172-23-01.

MATERIAL
The following is available from Cessna Parts Distribution through an appropriate Cessna Service Station for the suggested list price shown.
