Cessna Distributors, Agricultural, Single Engine, Multi-Engine, Caravan I, Caravan II and Propjet Service Stations and Cessna Pilot Centers

MODELS AFFECTED

All 1946 and On Propeller Model Airplanes.

DISCUSSION

Temporary Revisions for propeller airplane service publications are being developed and will be sent to applicable service stations as the revisions become available. These revisions will be made available in paper form only.

Upon receipt, the Temporary Revision shall be incorporated into the applicable manual as follows:

For paper publications: the Temporary Revision cover sheet should be inserted behind the manual’s title page to identify the inclusion of the revision into the manual. The new pages should be inserted into the manual at the appropriate locations and any superseded pages should be removed and discarded.

For aerofiche publications: the aerofiche frame (page) affected by the Temporary Revision should be identified as being affected by drawing a line through the frame with a permanent red ink marker. This will be a visual identifier that the information on that frame (page) is no longer valid and a Temporary Revision page should be referenced. Temporary Revisions should be collected and maintained in a notebook or binder near the aerofiche library for quick reference.

Beginning February 15, 1992, the latest Temporary Revision number will be added to the Cessna Revision Status Checklist Cards. This will be the key to determine the current service publication revision status and applicable Temporary Revision number.
