SE80-58

SUBJECT: IMPROVED WINDOW AND WINDSHIELD SEALER

AIRCRAFT APPLICABILITY: All Single Engine Aircraft (Except P210) (Including Reims Built Aircraft)

An improved window and windshield sealer (Isocryl 5603) is now being used on production aircraft. The new sealer has the following advantages:

1. Adheres well to both acrylic and aluminum.

2. The highly elastic property of 5603 minimizes windshield squeak and will not work out of a joint, providing a more durable seal.

3. This new sealer is resistant to cleaners and detergents used to clean windshields.

The improved sealer is available through the Cessna Dealer Organization. The suggested list price is shown below:
