Cessna Distributors, Single Engine and Agricultural Service Stations and CPCS

MODELS AFFECTED

All series of the following model airplanes:

120, 140, 150, 152, 170, 172, R172, 172RG, 175, 177, 177RG, 180, 182, R182, 185, 188, 190 and 195

DISCUSSION

The Continued Airworthiness Program (CAP) is a program of additional inspections to assist in maintaining aging airplanes in a safe and airworthy condition. This program does not replace existing maintenance schedules or inspection intervals; it specifies additional inspections which should be performed.

The items selected for inspection within the CAP are structural or systems items which, in the event of a failure, could cause substantial damage to, or loss of, the airplane.

For maximum efficiency, CAP inspections should be integrated into the scheduled maintenance of an airplane, and performed at specified intervals along with hundred hour, annual or progressive care inspections.

The CAP supplements the applicable airplane Service-Maintenance Manual, Service Bulletins/Letters, and Progressive Care and Continuous Inspection Operations Manual. If a conflict arises between instructions in the CAP and any other service publications, the publications with the latest date takes precedence.

COMPLIANCE

Compliance is recommended at the time intervals specified in the CAP to assist in maintaining the applicable airplanes in an airworthy condition.
MATERIAL

Complimentary aerofiche copies of the Continued Airworthiness Program for Model 100 Series Piston Single Engine Aircraft have been sent to Cessna Distributors, Single Engine and Agricultural Service Stations and CPCS. Additional copies are available from the Cessna Parts Distribution for the suggested list price shown.
