SUBJECT: WINDSHIELD SEALANT KIT FOR NON PRESSURIZED SINGLE ENGINE, CRUSADER AND SKYMASTER AIRCRAFT

TO: CESSNA ZONES, DISTRIBUTORS AND DEALERS

A windshield sealant kit is now available from Cessna for field use in replacing or re-sealing windshields on non pressurized Single Engine, Crusader and Skymaster aircraft.

The kit contains the latest factory used and authorized windshield sealants . . . .

1) A latex base strip sealant with high latex content which retains its shape and resists "creeping" or "flowing" at high temperatures.

2) An acrylic base extrudable sealant to resist deformation and deterioration.

3) A non solvent RTV which can be used around plexiglass type windows.

4) Applicators for the extrudable and RTV sealants and instructions for using the various sealers on windshields.

The sealant kit is available from the Cessna Supply Division at the suggested list price shown.
