April 5, 1971

SE71-7

SUBJECT: FLEXIBLE FLUID HOSE INSPECTION

AIRCRAFT AFFECTED:

All single engine aircraft equipped with flexible fluid hoses.

REASON FOR LETTER:

Present Service Manuals recommend inspection of all lines and hoses in the engine compartment each 50 hours of operation.

To emphasize the importance of these inspections and provide service personnel with more detailed inspection and maintenance procedures, the attached instructions have been prepared.

ACTION REQUIRED:

The attached inspection and maintenance procedures should be followed when accomplishing each 50 hour engine compartment inspection.

These expanded instructions will be incorporated in all aircraft Service Manuals at the next revision. In the meantime, it is suggested that the attached sheet be inserted in the engine section of existing Service Manuals.

NOTE: Additional copies of these inspection and maintenance procedures are available from Cessna Customer Services Department on request.
