A new control cable is being used for the flap position indicator in the flap pre-select system of current production aircraft.

This new control utilizes a wire wound outer housing in place of the previous plastic housing to provide smooth and positive actuation of the flap position indicator.

The new control is recommended for installation in earlier aircraft whenever inconsistent operation or "hanging up" of the flap position indicator is experienced.

New wire wound controls (part number 9864050-8) are available through the Cessna Dealer Organization at a suggested list price of $64.50 (S) each.

To improve the thru bolt installation on Model 188 alternators, effective with aircraft serial number 18802250 and on the 3/16" hex head thru bolts were replaced with ½" cap screws, (installed with loctite) to provide increased strength and reliability.

Service experience has shown that some of these cap screws did not have the loctite applies, and because keeping the proper torque on the thru bolts is important, all applicable aircraft are to have the cap screws checked at the next routine engine inspection, as follows:

continued . . . .
ITEM #3:

LITTER DOOR
OPERATION PLACARD

AIRCRAFT APPLICABILITY:

Model 180 and 185 Series
Aircraft equipped with the
Optional Litter Door

1. Apply 100 inch pounds counterclockwise torque to each capscrew.

2. Capscrews that do not hold this torque are to be removed, cleaned, and reinstalled using loctite 242.

3. Torque reinstalled capscrews to 60 inch pounds.

This procedure should also be accomplished on alternators received as spares, from Cessna, between July 1, 1975 and September 1, 1976.

Loctite 242 (part number LOCTITE242) is available through the Cessna Dealer Organization at a suggested list price of $11.30 (S) each.

Beginning with aircraft serial number 18052654 and 18502928, a placard was installed on production aircraft to describe proper operation of the optional litter door.

It is recommended that this same placard also be installed on earlier aircraft equipped with the optional litter door. The placard should be installed on the inside of the baggage door, near the top.

Litter door operation placards (part number 0705058-1) are available through the Cessna Dealer Organization at a suggested list price of $1.10 (S) each.
